次に、「問題7」を行います。

中学生の Yuka が英語の授業で行ったスピーチを聞いて、その内容に対する(1)~(3)の質問の答えとして最も適切なものを、ア~エの中から1つずつ選び、その記号を書きなさい。

では、始めます。

There are many kinds of difficult problems in the world today. We studied about some of them in class, and I'm especially interested in problems about energy and food, because we see both problems in our everyday life. I'll tell you about them now.

First, let's think about energy. Last month I joined a volunteer group to clean our town. When I was cleaning a park near my house, I was very surprised because there were many used plastic bags there. When you go shopping, do you receive plastic bags? They are made from oil, so we can save energy if we use our own bags.

Second, I'll talk about food. I watched a special TV program about food problems last week. It said that people in some other countries need more food to live. But we also know that people in Japan buy too much food to eat. We should think about people who don't have enough food and stop doing this.

Changing our way of life is not easy. But we have to find ways to save the earth. I've already started to use my own bag when I go shopping. And I'll only buy things I really need. Let's work together to make a better world.

Question 1 : When did Yuka join the volunteer group to clean her town?

Question 2 : What food problem in Japan does Yuka talk about?

Question 3 : What has Yuka already started to do when she goes shopping?

(英文と質問を繰り返します。)
